Skitties

Your talkative sidekick, chirping up the latest buzz
and community happenings!

About Skitties

Unveil the delightful world of Skitties, your AI companion designed to keep you in the loop about the latest community happenings. Say goodbye to information overload and the fear of missing out on events – Skitties has got your back!

The Challenge

Information Overload & **FOMO**

In the fast-paced world of crypto and community-building, staying on top of events and conversations can be overwhelming. FOMO (Fear of Missing Out) haunts every crypto user's journey.

Magical Solution

Community Building Simplified

Connect with like-minded individuals, foster new friendships, and build thriving communities effortlessly.

Efficient Time Management

No more endless scrolling! Skitties curates content, ensuring you get the essence without investing hours.

Target Audience

Community Builders

Those engaged in building and nurturing communities, seeking a tool to simplify communication and engagement.

Event Attendees

People interested in staying informed about upcoming events without being overwhelmed by information.

Social Media Managers

Individuals handling social media for projects, who want a streamlined way to manage content and interactions.

Busy Professionals

Professionals who want to stay connected but struggle with time management and information overload.

Social Media Users

Individuals active o various platforms who want to manage their online presence more effectively.

Features

Feed Wizardry

Get personalized community feeds delivered straight to your Telegram. Your content, your way, effortlessly.

Summarize the Noise

Busy day? Skitties distills event details into bite-sized summaries, saving you time without sacrificing the scoop

Natural Chatter

Interact seamlessly with Skitties. Generate replies, posts, likes, and shares as if you're talking to a friend.

Modes

Private Chat

Tailor your Skitties experience with personalized conversations.

Group Harmony

Elevate your group chats with Skitties' charm and utility.

Use Cases

Post without the App

You're attending a blockchain conference, and you want to share the highlights without opening the app. Skitties allows you to draft a post, send it to Telegram with context, and voila! It's posted on your social media platforms.

Get Event Summaries

Wondering what's happening in the crypto space nearby? Ask Skitties for event summaries. It fetches details on the latest meetups, webinars, or conferences, keeping you informed without the hassle of extensive research.

Connect with Like-minded Individuals

Attendees at a crypto event catch your interest, but initiating conversations seems daunting. Skitties steps in, matching you with people who share similar interests. Building a community starts with connecting over common ground.

Natural Replies

Someone comments on your latest crypto post, and you want to reply naturally but are short on time. Skitties generates a thoughtful and engaging response, maintaining a conversational tone without the need for extensive typing.

Quick Demo

Natalie

Skitties

Welcome anon! Skitties are your little birds that live Farcaster. 🦜

Constanttly, they fly up and down the blocks and around the hubs to bring you the latest news, conversations directly into your chatbox.

Get started by typing /search 'keyword' to find your people, or /trending to see what's up.Slitties also keep tab on who is /popular to keep you in the loop.
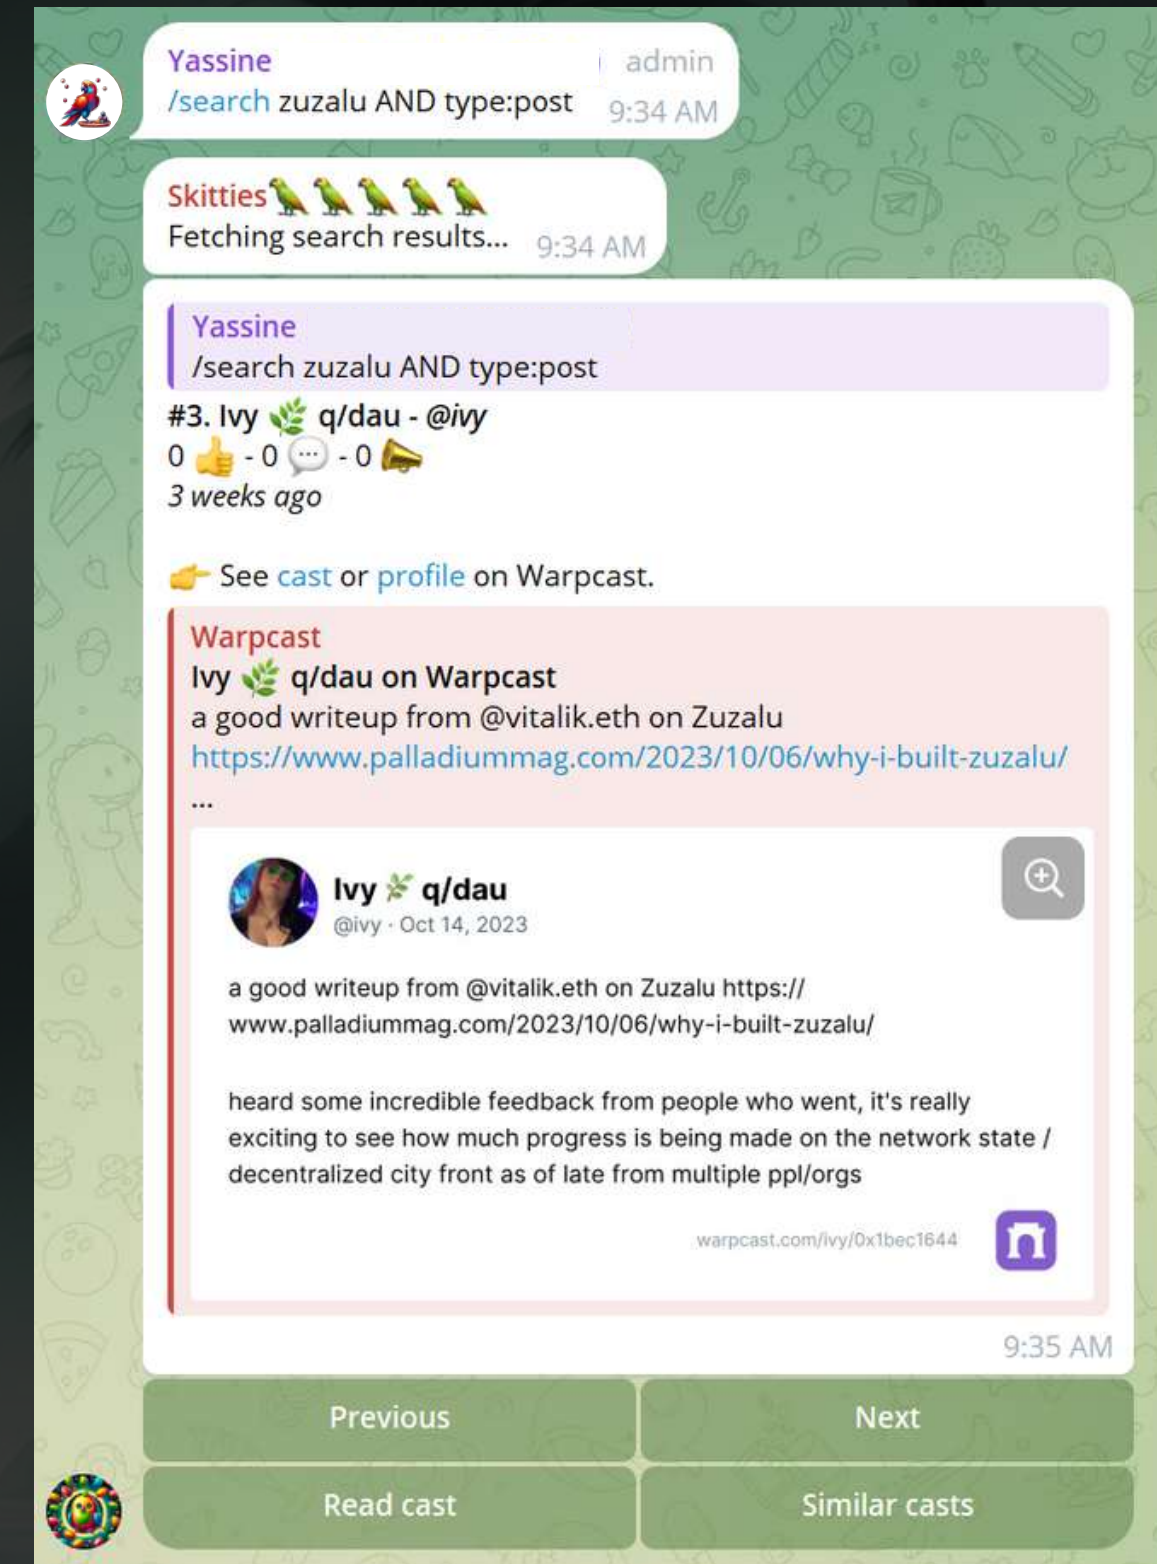

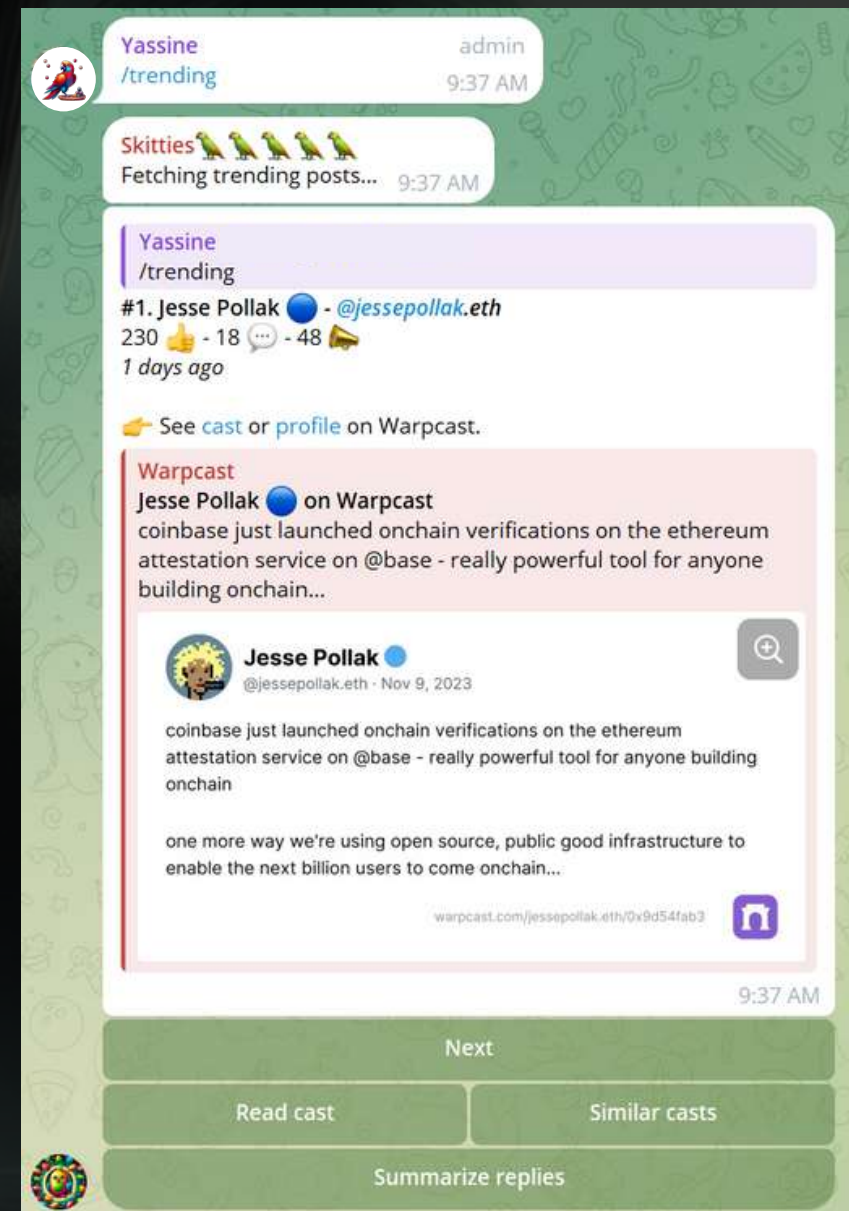

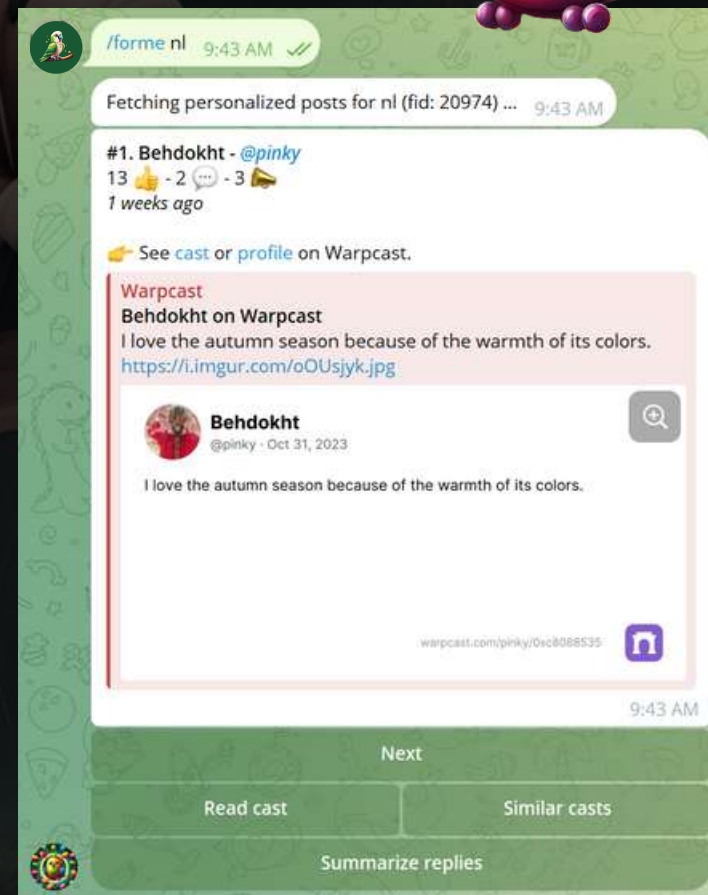

Are you a Farcaster user already? Type /forme 'handle' to see your personalized feed. Or heck, ask Skitties to show you Vitalik's! (/forme vitalik.eth)

And don't forget, Skitties have highly dense artificial neurons so they are well versed in human language... They can summarize the long conversations and can give you time back and less FOMO.

And when you find something interesting, Skitties will get you more of it. Just type /similar 'post_link' or the similar button under a cast you like.

search latest Farcaster conversation

Example

Post without using the actual social media platform.

Natalie

Skitties, I want to share my excitement about a new DeFi project. Craft a post and share it on my Farcaster.

Skitties

Sure, here is a Farcaster post about your excitement for a new DeFi project:

Natalie Now
New DeFi Project Alert!

I've been following SkittiesFi for a few months now, and I'm really impressed with their progress. They've already launched a successful beta, and they have a roadmap that is full of exciting features.

#DeFi #newproject #bullish

Looks Good!

Outcomes

User effortlessly maintains an active social media presence without logging into various platforms. Skitties's ability to generate tailored content and handle posting tasks enhances efficiency, allowing the user to stay engaged in the crypto community with minimal effort.

Impacts

The potential impact of Skitties is substantial. By simplifying community communication, aiding in event awareness, and facilitating natural interactions, it empowers crypto enthusiasts, community builders, and social media users. The impact extends to improved time management, enhanced community engagement, and streamlined social media presence.

Innovation & Technical Complexity

Skitties showcases innovation in its approach to handling information overload. Deep learning based recommendation systems and the natural language processing for generating replies and posts, along with the ability to summarize content, demonstrates technical sophistication. While it builds on existing technologies like Telegram, its features introduce novel concepts, making it an innovative solution in the crypto community management space.

Roadmap and Future Features

1
Sentiment Maestro
